

REACH Declaration

Dear Sir, Madam,

REACH is a European Community Regulation on chemicals and their safe use (EC 1907/2006). It deals with the **R**egistration, **E**valuation, **A**uthorization and **R**estriction of **C**hemical substances and their associated risks for the public health and environment. The REACH regulation entered into force on 1 June 2007 and will be phased in until 2018.

Currently we are investigating the REACH regulation and its impact on our products (referred as articles in REACH). As far as our articles are concerned, all the Tecnotion articles are supplied as finished products without an intended release of chemical substances under normal conditions of use, as defined by REACH.

Based on the "article" criteria in the REACH regulation, all articles manufactured by Tecnotion are interpreted to be exempt from substance regulation and therefore compliant with the REACH regulation.

However, Tecnotion continues its research and monitors if substances included in the candidate list of SVCH's (Substances of Very High Concern), are contained in our articles and packaging materials in a concentration above 0.1% (by weight). For our investigation we use the relevant information from our suppliers. Depending on new information we retrieve as a result of our research, we will inform you as soon as possible with the new deliveries.
